PROFILE

Computer Science & Engineering undergraduate focused on mobile app development, eager to design useful, real-world Flutter applications. Quick to pick up new tools, with hands-on project experience and a strong record of student leadership and volunteer work.

WORK EXPERIENCE & PROJECTS

Padma Courier 2025
Computer Operator

- Managed parcel booking, shipment records, and customer information using the company's computer system.
- Processed data entry, generated invoices, and prepared daily reports while maintaining accurate records.
- Assisted customers by tracking parcel status, resolving basic queries, and ensuring smooth daily operations.

Modern Portfolio 2026

- Developed a modern and fully responsive portfolio application using Flutter, available on both Web and Mobile platforms, with smooth navigation, responsive layouts, and dark/light theme support.
- Integrated Firebase as the backend for data management and showcased skills, projects, education, and professional journey through an interactive interface with a dedicated projects section and contact page.

E-Commerce App 2026

- Developed a cross-platform E-commerce app using Flutter and Firebase, featuring real-time data sync, custom theming, and localization.
- Implemented Firebase Crashlytics and Analytics to ensure high app stability and track user behavior for performance optimization.
